Bielbet HDPE C250 Channel with B125 Galvanised Brickslot Top

HDPE Channel with Galvanised Brickslot

The NICE slotted top channels were specially developed for integration of the drainage in high-quality natural stone and paving surfaces. The reduction to a discrete inlet slot enables decorative surface designs without compromise. The steel shaft with smooth interior and exterior duplications enables a gapfree installation of the stones and easy cleaning of the inlets. Innovative design for durable, safe function.

APPLICATIONS:

- B125 Loading
- Pedestrian precincts
- Kerbside drainage
- Slow moving light commercial vehicles

CHANNEL MATERIAL SPECIFICATION:

- n HDPE Channel
- n Galvanised Steel Slotted Top
- n Slot width 10mm

| Product Code | Length(mm) | Internal Width(mm) | External Width | Total Height | Channel Height | Top Height | Slot Width |
|--------------|------------|--------------------|----------------|--------------|----------------|------------|------------|
| MH-DC-610195 | 1000 | 100 | 130 | 185 | 105 | 100mm | 10mm |
| MH-DC-610194 | 1000 | 100 | 130 | 130 | 50 | 100mm | 10mm |
| MH-DC-610196 | 1000 | 100 | 130 | 155 | 105 | 50mm | 10mm |
| MH-DC-610197 | 1000 | 100 | 130 | 100 | 50 | 50mm | 10mm |

- + optimised self-cleaning with smooth-walled, downward-flaring shaft
- + rounded stabilisation bars
- + outward fold duplication for gap-free installation of the covering
- + variable surface design
