GHD90	890 x 890mm	770 x 770mm	100mm	3100cm ²	ICIM

FRAME

It is square in shape with a tall reinforced border, which guarantees a stable setting and greater safety in traffic. The external border is flanged to optimise its hold in the cement. There is also an inside border which holds the siphon.

GRATING

It comes flat and square in shape, with parallel rectangular slots. It can be installed in the frame with the slots directed perpendicularly to the direction of traffic, no matter the direction of the frame, in order to guarantee the safety of cyclists. Furthermore, it can be blocked with stainless steel screws.

INTENDED USE

it is designed for footpaths and parking areas for all types of road vehicles (see norm EN 124 group 4)

TREATMENT

The manhole cover has a protective coating of black paint.
